

Export Module – User Stories for Development

Export DSR

- As a **user**, I want to create a new export job with BL, SB, and container details so that I can manage shipments easily.
- As a **user**, I want to update export-related dates (GEGM, dispatch, handover) so that I can track progress.

E-Sanchit

- As a **user**, I want to upload documents (PDF, JPG, DOCX) to E-Sanchit so that I can comply with customs requirements.
- As a **compliance officer**, I want the system to validate document formats so that errors are minimized.

Documentation

- As a **user**, I want to attach assessed copies, LEO, and gate passes so that all export documents are available in one place.
- As a **user**, I want to generate a consolidated export file so that I can share with stakeholders.

Submission

- As a **user**, I want to submit forms and bills electronically so that I can reduce manual work.
- As an **admin**, I want to review and approve submissions before final dispatch.

Booking

- As a **user**, I want to record vessel and container booking details so that logistics are streamlined.
- As a **user**, I want booking confirmations stored in the system so that there is no manual dependency.

Export Operations

- As a **user**, I want to update transport details (road/rail) so that I can track handovers.
- As a **user**, I want alerts for free time expiry so that I can avoid penalties.

Directory

- As a **user**, I want to search and filter export jobs so that I can find records quickly.
- As a **manager**, I want a dashboard view so that I can see all export activities at once.

Handover Module

- As a **user**, I want to integrate handover details with Odex and MMD3 so that external processes are automated.
- As a **user**, I want to log manual handovers so that records are complete.

General Features

- As an **admin**, I want to define role-based access so that sensitive data is protected.
- As a **user**, I want to export data to Excel so that I can share reports.
